

1. Question about statistical inference
2. Question about null hypothesis
3. Question about alternative hypothesis
4. Question about population mean
5. Question about population proportion
6. Question about mean difference
7. Question about proportion difference
8. Question about confidence interval and hypothesis testing their relationship
9. Question about p-value
10. Question about population mean
11. Question about population proportion
12. Question about mean difference
13. Question about proportion difference
14. Question about p-value
15. Question about population mean
16. Question about population proportion
17. Question about mean difference
18. Question about proportion difference
19. Question about p-value
20. Question about population mean
21. Question about population proportion
22. Question about mean difference
23. Question about proportion difference
24. Question about p-value
25. Question about hypothesis testing

Note that we have covered **Chapter 10** From Math\_Stat book which is our main reference book.

Above mentioned head lines are the ones such that we will only work on them during the final examination namely 25 final part questions will purely based on these headlines.
