

## Why MBA Program?

- You will receive your education in Azerbaijan - a country located at the crossroads of East and West, on the shores of the Caspian Sea, where stability prevails, universal values and multiculturalism are promoted, and religious and ethnic tolerance thrives;
- Choosing the MBA Program is a successful decision for you;
- The MBA Program shapes you into a business professional. It develops and expands your potential. Your peers in the MBA Program will be at least as skilled and hardworking as you are. This means that the expectations from professors and instructors will be high;
- Specializations are offered in **Azerbaijani, English, and Russian**;
- The MBA Program is a unique program that brings together individuals who are respectful of diverse perspectives, energetic, skilled, proactive, and achievement-oriented. By studying here, you join a dynamic program, gain success alongside the innovative development of the MBA Program, and acquire valuable skills and experience;
- To support your scientific research initiatives, research centers such as "Development Economics" and "Applied Artificial Intelligence," along with specialized research sub-units within the MBA Program, have been established;
- More than 150 professors and teaching staff in the MBA Program hold doctoral degrees from highly ranked universities in the USA, Canada, the UK, Germany, Italy, Sweden, France, Turkey, Russia, and other countries. The faculty also includes internationally certified professionals and company executives;
- Instructors integrate their scientific research and practical cases extensively into the teaching process;
- The program enhances students' critical thinking, leadership skills, business communication proficiency, problem-solving and analytical abilities, decision-making agility, teamwork, and interactive learning experiences. It also includes simulations and real-world scenarios to develop essential skills such as Smart Skills, Hard Skills, Digital Skills, Academic Skills, Digital Literacy, and Artificial Intelligence competencies - preparing students for success in the modern workforce;
- The courses are aligned with the curricula of the world's leading universities.
